An Investment in Knowledge pays the BEST interest. – Ben Franklin

Advise of Albert Einstein to a young cancer scientist Ernest
Sternglass “Don’t go back into academia. The will kill every
bit of originality out of you.

- Make the LIE big, ...Make the LIE simple,
...KEEP SAYING IT, and eventually they will
Believe it. — Adolph Hitler.
- REMEMBER JOE BIDEN WON THE 2020....ELECTION FAIR &
SQUARE !!!!! *...and Donald Trump
is a convicted Felon.*

I DO NOT FEAR ARTIFICIAL INTELLIGENCE AS MUCH
.....AS I FEAR GENUINE STUPIDITY.

IN THESE TROUBLED TIMES REMEMBER,

FEAR IS A REACTION..

.... COURAGE IS A DECISION.

THE PURPOSE OF THIS SHOW IS TO

EDUCATE AND EMPOWER YOU

THE LISTENER

I MAKE THE COMPLEX UNDERSTANDABLE EACH &

EVERY SHOW. -R. Limbaugh

OTHERS ABOUT THE SHOW**

THE CANCER INDUSTRY by Mark Sloan

The War on Cancer was declared in 1970 by Richard Nixon
\$500 B or more has been spent on Cancer research since...

What are the results ? ?

Very Little.

WHY? The people who profit from cancer treatments
are asked to put themselves out of business by finding the cure.
The Cancer industry generates over \$125 B per year

THE GOOD NEWS: CERVICAL CANCER !

Cervical cancer was once one of the most common causes of cancer death for American women. The cervical cancer death rate has dropped by more than half since the mid-1970s because of prevention and screening (PAP SMEAR), although rates have stabilized in recent years. However, in women ages 30-44, rates have increased 1.7% each year from 2012 to 2019.

In contrast, rates declined 11% each year for women ages 20-24, probably reflecting the first signs of cancer prevention from HPV vaccination.

Still, About 4,360 women will die from cervical cancer this year.

Indeed the death rate at $4/10^5$ is unchanged in 30 years !

Promiscuity, STD's such as HPV, HIV, Hepatitis B Virus (HBV), Hepatitis C Virus (HCV), and Syphilis and chlamydia, increase the risk of developing cervical cancer.

- The American Cancer Society usually sells doom & gloom to make money.
“Almost half of everybody alive today will develop cancer”
Cancer has become a \$126 Billion /year INDUSTRY.

THERE ARE THREE (3) APPROACHES:

I. CUT (SURGERY)

– This instinctive approach was criticised by the Great 15th

Century physician Paracelsus. “It should be forbidden and punished to remove cancer by cutting, burning, cautery or other fiendish tortures.”

- J. Marion Sims, a founder of Memorial Sloan-Kettering Cancer Center, was a racist fiend who did experimental surgery on black slave women. Some women survived up to 30 operations in a 4 year period before anesthesia. In 1884 with the advent of anesthesia, this fiend founded Memorial Sloan-Kettering Cancer Center and began operating on wealthy women and European immigrants.

***October 16, 1846 William T. G. Morton (1819-1868) made history by being first in the world to publicly and successfully demonstrate the use of ether anesthesia for surgery. This occurred at what came to be called **"The Ether Dome,"** at Massachusetts General Hospital on patient Edward Gilbert

- Cancer manipulation by biopsy, reduction, or removal PROMOTES METASTASIS. THIS HAS BEEN KNOWN FOR OVER 100 YEARS !! Yes ladies, this includes lumpectomy.

- SURGERY NEAR A TUMOR INCREASES Growth AND Tumor Adhesion FACTORS - N0, VEGF, EGF (epidermal growth factor), Free Radical Oxidative damage. Surgery increases STRESS Factors: Adrenaline, Cortisol, Estrogen, Serotonin, Histamine, & Lactic Acid, which promote METASTASIS.

2.POISON [“CHEMOTHERAPY”]

- mustard gas was used in WWI AND WWII =>damaged bone marrow and lymph tissue in military autopsies. What a perfect agent for cancer, right? Dr.s Goodman & Gilman of Yale used mustard gas for rats with tumors and observed shrinkage. NEXT STOP, lymphoma patients and other late stage cancers..... shrinkage (not survival) occurred and the RACE WAS OFF !

- Dr. Gerson developed diet (fresh fruit/vegetable) + liver extract (vitamins), thyroid, coffee enemas.

- 1980 Lancet article 78 chemotherapy patients, 80 no-intervention patients.
THE SURVIVAL TIME WAS THE SAME.
2004 retrospective analysis showed 98% chemotherapy failure rate !! And that patients with chemotherapy do not live a day longer. (LAWRENCE Akerman).

- If one is going to try chemicals , DO IT NOT TOXICALLY
 - Brodie Therapy
 - Methylene Blue
 - Chloride Dioxide.

3. BURN ... (RADIOTHERAPY)

Ionizing x-ray and gamma-ray radiation directed at tumors are thought to kill cancer cells.... but they also damage every cell in its path and set in motion cascades of negative physiologic effects .

- TODAY, about 60% of cancer patients get radiation “therapy”
 - But Research on outcomes has been manipulated to show good result. Eg. Radiation damages all organs, including the heart. When a lung cancer patient is irradiated and dies of heart disease, it is credited to “natural causes”.
 - BUT all forms of x-radiation elevate risk of cancer that is cumulative
Radiation for HODGKINS LYMPHOMA significantly increases
Risk for stomach cancer, breast cancer pancreatic cancer
- Further radiation => BYSTANDER EFFECT, in that cells injured by radiation emit cytokines that transfer identical damage to non-irradiated cells.
- Like Chemotherapy radiation causes Fatigue (90%), nausea, vomiting, h/a
- BMJ article concluded mammography actually increased the incidence of Breast Cancer. DISCUSS.

- EARLY DETECTION [E.D. }:

- Seemed helpful for cervical cancer, yet death rate is same over 30 years.
- NO correlation between E.D and mortality in LUNG CANCER [Lawrence Akerman].
- NO correlation between E.D with surgery and mortality in BREAST CANCER
In fact delayed surgery showed the largest reduction in mortality.
- MAMMOGRAPHY DID NOT DECREASE MORTALITY
FROM BREAST CANCER, Rather it actually increase mortality
from breast cancer. INDEED in a 7 year follow-up study THERE IS
A 36% increased mortality in women who had mammography screening.
- in 1992 a 10 year study showed almost 90% survival of prostate cancer victims
who are UNTREATED! Indeed a 2010 Swedish Study showed only 2.4%
untreated prostate cancer patients die of the actual disease over 20 years.
- 60,000 American women are diagnosed with “**EARLY DUCTAL
CARCINOMA** in situ (DCIS). **Twenty-year survival studies have shown
only 3.3% of these women will die of breast cancer.** RECALL THE “Scare”
DRILL IS SURGERY=>RADIATION +/- chemotherapy
..... ALL of which increase metastasis. YES, CHEMO also increases
metastasis of the cancer.

CONCLUSION:

**Our chances of surviving a cancer diagnosis is increased
400% by simply saying “NO” to useless cancer screening
tests and mainstream cancer treatments like .surgery,
chemotherapy and radiation therapy.**

.A Landmark Victory for BY Physicians and Patients – and the First Amendment – AAPS v. ABIM

A precedent-setting ruling in favor of the First Amendment was issued today by the U.S. Court of Appeals for the Fifth Circuit. This influential Court established the right to object in court to censorship of physicians' speech on topics ranging from government Covid policies to abortion, stated AAPS General Counsel Andrew Schlafly.

The Court held that there is a constitutional "right to hear" that enables a sponsor of conferences, such as Plaintiff Association of American Physicians & Surgeons Educational Foundation ("AAPS"), to challenge censorship that chills presentations at its events. "This landmark ruling will be cited nationwide for decades to come," Mr. Schlafly observed.

AAPS sued three medical specialty boards for their threatened actions against the board certifications of physicians because of speaking out on medical controversies. Physicians earned and need these board certifications in order to practice medicine in most hospitals and remain in most insurance networks, as Mr. Schlafly pointed out.

Defendants are the American Board of Internal Medicine ("ABIM"), the American Board of Family Medicine ("ABFM"), and the American Board of Obstetrics & Gynecology ("ABOG"). In addition, Alejandro Mayorkas, Biden's Homeland Security Secretary, is a defendant due to alleged government interference with freedom of speech.

The Fifth Circuit also invalidated Galveston Local Rule 6, by which that federal district court has infringed on plaintiffs' right to amend their lawsuits. The Fifth Circuit agreed with AAPS that this district court rule is contrary to the Federal Rules of Civil Procedure, and thus must be voided.

“AAPS can now pursue its claim against censorship by the Biden Administration,” AAPS Executive Director Jane Orient, M.D., stated.

Fifth Circuit Judge James Ho agreed with the panel majority on the key issues and wrote separately to decry attempts by some today to impose censorship on others. “In America, we don’t fear disagreement—we embrace it. We persuade—we don’t punish. We engage in conversation—not cancellation,” Judge Ho wrote.

“We know how to disagree with one another without destroying one another. Or at least that’s how it’s supposed to work,” Judge Ho added as he sided fully with this lawsuit against censorship.

“With this landmark ruling in favor of the First Amendment, our country can end improper censorship of viewpoints,” Andrew Schlafly stated.

.

FACTLETS AND WEIRD ITEMS

- LIVE IN AN OLD HOUSE WITH **LEAD PIPES?**

Reduce the lead in your drinking water by funning the “COLD” water for a >15 seconds before harvesting a glass of water.

Cold water is less corrosive than hot water, so contains less lead

- Recall lead accumulates in soft tissues of the body- blood, bones, muscle, bone marrow as well as kidney, and brain. Symptoms: mental retardation, seizures, and fatigue and apathy.

- LEAD speculated to have CONTRIBUTED TO THE FALL OF ROMAN EMPIRE: Romans used led water pipes and cooking pots & pans. They even used lead to treat diarrhea. LEAD causes infertility, fatigue, apathy mental retardation, and early death.

- WHAT IS THE MOST **COMMON HUMAN DISEASE?**
GINGIVITIS AND PERIDONTAL DISEASE.

- WHAT IS “**MAD COW DISEASE**”?

It is a disease of cattle effecting the brain, called BSE (bovine spongiform encephalopathy which is transmissible to humans who eat contaminated beef. The disease is incurable, untreatable, and fatal and similar to Creutzfeldt-Jakob Disease (CJD).

- WHAT IS **LYME DISEASE** ?

Lymes is a spirochete (*Borrelia burgdorferi*) transmitted by the tick *Ixodes dammini* which injects sirochete-laden saliva into the blood stream of the victim or deposits fecal matter on the skin.

The disease is multisystemic beginning with a malar rash conjunctivitis, urticaria, followed by fatigue, headaches, fever, chills, myalgia. In STAGE TWO (weeks / months later) arthritis develops especially in large joints, then cardiac and neurologic abnormalities. It can be mis-diagnosed as multiple Sclerosis. Antibiotics (tetracycline, PCN, or erythromycin can help in stage II.

- Methylene Blue, or Chloride Dioxide

- WHAT **PERCENTAGE OF AMERICANS SMOKE** ??

In 1965 was 40%

At present << 24%

- What is the composition of cigarette smoke ? ?

There are ove 4,000 chemicals- CO_2 , CO, methane, nocotine are major components but acetone, acetylene, formaldehyde, propane, cyanide, toluene are also inhaled.

Men and other mammals live longer if they are castrated, says researcher

Said researcher is **Cat Bohannon**, who has quite a way with words when she discusses the male anatomy. Bohannon **wonders aloud** to an audience **why men insist on keeping their bodies intact**. Bohannon said castration was a “way to make male mammals live longer,” and that castrated men lived longer than their “regularly balled peer.”

Additional research is needed, as we should expect to see men with leftist political beliefs have significantly longer lifespans if this is the case.

There’s no word on whether Bohannon considers **HER BREASTS** potentially cancerous “death bags.” Probably not, as the title of her book suggests a distinct female chauvinism: *Eve: How The Female Body Drove 200 Million Years of Human Evolution*.

Watch out boys, here she comes:

Speaking at a festival, Bohannon “wonders” aloud my men insist on “smuggling two little death nuggets” through their whole lives. She’d likely say she was posing a question about why evolution designed the male reproductive system to have a shortening effect on men’s life span. But it beggars belief that Bohannon does not understand that evolution only “cares” about lifespans long enough to complete reproduction. Is anyone else smelling vindictive feminism?

Daily Marijuana Users Outnumber Daily Drinkers In US, Survey Finds

The AP (5/22, Johnson) reports,

“Millions of people in the U.S. report using marijuana daily or nearly every day, according to an analysis of national survey data, and those people now outnumber those who say they are daily or nearly-daily drinkers of alcohol.” Although “alcohol is still more widely used...2022 was the first time this intensive level of marijuana use overtook daily and near-daily drinking, said the study’s author, Jonathan Caulkins, a cannabis policy researcher at Carnegie Mellon University.” Caulkins said, “A good 40% of current cannabis users are using it daily or near daily, a pattern that is more associated with tobacco use than typical alcohol use.” These findings were published in Addiction.

The Hill (5/22, Nazzaro) reports, “About 17.7 million people in 2022 recorded daily or nearly daily use of marijuana, compared to the 14.7 million who reported the same habits for alcohol, marking the first time in the past 30 years that daily marijuana use exceeded alcohol use, according to an analysis published Wednesday that looks at data from the National Survey on Drug Use and Health.” Additionally, “from 1992 to 2022, there was a 15-fold increase in the rate of daily or near daily use marijuana use, the analysis found.”

*****Very interesting and very frightening. Is everyone in the White House, using MJ? It would explain a lot of their actions

Up To Half Of UCLA Med Students Are Failing Basic Medical Competency Tests, Affirmative Action To Blame

by Ashe Schow May 24, 2024 DailyWire

<https://www.dailywire.com/news/up-to-half-of-ucla-med-students-are-failing-basic-medical-competency-tests-affirmative-action-to-blame>

- The Title says it all.
-

<https://www.dailymail.co.uk/health/article-13443245/doctor-colon-cancer-young-people-signs-symptoms.html>

May 23, 2024 Daily Mail

- **Dr Kimmie Ng**, The Boston oncologist has launched one of the the world's first center dedicated to studying an **EXPLOSION OF GI CANCERS IN YOUNG PEOPLE**.

- Approximately 150,000 patients are diagnosed each year with colorectal cancer in the US. About 18,000 of them are under the age of 50, Dr Ng said. these very, very young people are often very healthy.'

- red flag symptoms may include a change in your bowel habits. So new diarrhea, new constipation, a change in the caliber of the stool, including thinner pencil thin stools.'

- **THE PURPLE CABBAGE TEST** Are you acidic?
Are your kidneys getting "old"? Do you have a hidden cancer pouring out Lactic Acid, making you "tired"?
 - 1 > Blend 1/4 purple cabbage in a quart of water overnight,
 - 2 > Drain off the water , leaving a purple liquid .
 - 3 > pour a small amount in your toilet making the water a
Very light purple.
 - 4 > observe when urine is added
 - =>BLUE is alkaline your Cool!
 - => purple is acidic, eat more leafy vegetables
 - ==> RED or PINK is VERY acidic, think about a cancer
work-up if you are losing weight.
Consider less red meat

HEALTH HACKS & FACTS – II

- IF YOU ARE A MAJOR CARNIVOR, CONSIDER more veggies less meat to reduce risks of a] cancer
b] heart disease c] AODM II d] CVA
start with "Veggie Day" once a week, opt for the Tofu
- In India and Okinawa they live longer because 85-90% of

their food is plant based. They eat fish and meat less than three meals a week.

- Zing up your steamed vegetables with a salad vinaigrette
 - Dark chocolate helps regulate the stress hormone cortisol and stabilize your metabolism.
 - The simple act of smelling your morning coffee can help lower stress.
-

No Deal: W.H.O. Fails to Secure Global Pandemic Treaty

by Simon Kent May 26, 2024, Breitbart News

No deal. That was the message for World Health Organization (W.H.O.) chief Tedros Adhanom Ghebreyesus on Friday after his proposed global pandemic treaty was rejected after two years of closed-door meetings in Geneva, Switzerland.

AP reports Roland Driece, co-chair of W.H.O.'s negotiating board for the agreement, acknowledged countries were unable to deliver an agreed proposal. W.H.O. had hoped a final draft treaty could be agreed on at its yearly meeting of health ministers starting Monday in Geneva.

“We are not where we hoped we would be when we started this process,” he said, adding that finalizing an international agreement on how to respond to a pandemic was critical “for the sake of humanity” even as a host of countries disagreed with the basic principle that unelected, unaccountable, health bureaucrats could Call-

somehow decide major global decisions on government policies.

Addressing a sullen final day of negotiations, the W.H.O. chief insisted, “This is not a failure.”

“We will try everything — believing that anything is possible — and make this happen because the world still needs a pandemic treaty,” Tedros said. “Because many of the challenges that caused a serious impact during COVID-19 still exist.”

Despite the desire of W.H.O. career bureaucrats to push ahead with the scheme, Britain’s department of health had already said it would only agree to an accord if it adhered to British national interest and sovereignty.

Tedros Adhanom Ghebreyesus is an Ethiopian public health official, researcher, diplomat. he earned a Doctor of Philosophy in community health from the University of Nottingham for research on the effects of dams on malaria transmission in the Tigray region

Earlier this month, U.S. Republican senators wrote to the Biden administration, arguing the draft treaty focused on issues like “shredding intellectual property rights” and “supercharging the WHO.” They urged Biden not to sign off.
